

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Internato in Reparto di Dialisi

2122-4-H4101D106

Aims

The aim of the internship is:

- To provide knowledge on the general principles of the different types of dialysis, on the vascular access and peritoneal catheter
- To provide basic knowledge on extracorporeal circulation and its complications
- to provide a direct experience of management of patients on dialysis treatment (both in acute and in chronic therapy)
- to offer the possibility to approach the research activity

to favor the development of a scientific mentality and the acquisition of a scientific methodology

Contents

The student will flank the tutor physician during his/her daily work in the different sections of the Dialysis Unit (hemodialysis and peritoneal dialysis)

Detailed program

The student will flank the tutor physician during his/her daily work in the different sections of the Dialysis Unit (hemodialysis peritoneal dialysis, critical care dialysis, outpatient clinic). He(she) will see how to set a dialysis session, its complications and those of uremia. He(she) will know how to treat anemia, bone disease and to avoid cardiovascular complications.

Prerequisites

Activity for medical students starting from the 4th year of course of Medicine and Surgery

Teaching form

Attendance in the Dialysis Unit and in the outpatient clinic for patients in regular dialysis treatment, subject to any ministerial changes following the COVID pandemic situation

Textbook and teaching resource

The teaching resource will be indicated during the internship

Semester

To be verified with the tutor

Assessment method

Achievement of the planned number of hours (50 hours)

Office hours

By appointment
