

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Internato in Reparto di Nefrologia

2122-4-H4101D112

---

#### Aims

The aim of the internship is:

- to provide a direct experience of management of patients with acute and chronic renal diseases, including renal transplant patients, to the student
- to have the opportunity to approach an important branch of internal medicine
- to offer the possibility to approach the research activity

to favor the development of a scientific mentality and the acquisition of a scientific methodology

#### Contents

The student will flank the tutor physician during his/her daily work in the different sections of the Department (nephrological ward and outpatient clinic)

#### Detailed program

The student will flank the tutor physician during his/her daily work in the different sections of the Department (nephrological ward and outpatient clinic). He/she will learn how to collect the medical history, to perform a physical examination with particular reference to the kidneys and the urinary tract; he/she will know the main nephrological syndromes and the diagnostic tests to reach a correct diagnosis.
