COURSE SYLLABUS

Public Health

2122-3-I0302D019-I0302D054M

Aims

Understand fundamentals of Public Health and Public Health practice

Contents

The aim of the course is to provide students with principle, concepts and methods of public health. Specifically, after an introduction to public health, the course will appraise the following: evolution of the concept of health, demographic and epidemiologic trends, fundamentals of epidemiology, primary, secondary and tertiary prevention tools, public health and healthcare systems, finance and provision of public health services.

Detailed program

The aim of the course is to provide students with principle, concepts and methods of public health. Specifically, after an introduction to public health, the course will appraise the following: evolution of the concept of health, demographic and epidemiologic trends, fundamentals of epidemiology, primary, secondary and tertiary prevention tools, public health and healthcare systems, finance and provision of public health services.

Prerequisites

Teaching form

Lectures

Textbook and teaching resource

Signorelli C (editor). Igiene e Sanità Pubblica. SEU, Roma, 2017

The teacher will provide other educational materials

Semester

Second semester

Assessment method

Written test in itinere. Multiple choice.

The final mark, based on the average score obtained by the students during the different evaluations, is set during an oral interview with the student, during which the written tests are scrolled to check mistakes

Office hours

On appointment
