UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Internship in Clinical Molecular Biology

2122-3-I0302D036

Aims

knowledge of the commonly used techniques in the clinical molecular biology unit

Contents

INTERNSHIP IN a CLINICAL MOLECULAR BIOLOGY laboratory

Detailed program

PCR-based methods and techniques. Performance evaluation. Product detection. Positive and negative controls

Prerequisites

knowledge of theoretical PCR basis

Teaching form

attendance in the CMB lab

Textbook and teaching resource

Semester

Assessment method

frequency molecular biology laboratory

Office hours

by email appointement
