UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Traineeship I

2122-1-I0201D134

Aims

- the student will develop the ability to conduct, under tutor supervision, and in partial independence the anamnestic data collection, the functional assessment and the rehabilitative treatment. The student will learn to approach the patient with professional ethic and deontology. The treatment should be conducted following the therapeutic project. the student will develop communicative skills needed for a correct interaction with patients, clinicians and patient family. the second year student will learn to manage and plan his own learning objectives. Every activity will be conducted under a clinical tutor supervision attending a rehabilitation facility.
