

SYLLABUS DEL CORSO

Infermieristica e Scienze Umane

2122-3-I0101D018-I0101D058M

Aims

Bring students to a critical approach concerning accountability and autonomy in professional practice addressing: nurse's accountability and professional regulations; l'interprofessionalità, support workers and the risk management. Nursing education in Italy. National and regional laws for the Continuing Medical Education (ECM).

Contents

The aim of course is to introduce the student to know the historical and epistemological pathway that led to the birth and the development of nursing care in Italy and in the world.

The student will also be able to critically analyze the ethical and deontological aspects present in the professional context; deepen the knowledge of the code of ethics national and some internationally recognized nursing codes, address the most relevant professional ethics issues through the use of the decision model of Fry and Johnstone (e.g. ethical dilemmas, conflicts of values and assistance problems encountered in the practice of professional practice); to deepen professional principles, concepts and values; know and discuss topics related to bioethics such as end-of-life ethical issues, aspects related to the objection and the conscience clause research and clinical and care testing, fairness of care and rationality of services; resource allocation; nurses' ethical considerations during a pandemic. Aspects related to ethical responsibility.

The knowledge of this aspects will be the essential to read the modern health context and promote, through the professional regulations and problems, the development of a critical thought at the bottom of the research and the practice.

Detailed program

Learn about regulatory and professional antecedents; learn about criminal, civil and disciplinary responsibility; identify nurse accountability in management and use of social media; analyze accountability in nursing practice and the role of support workers and the inter-professional dimension; know and identify nurse accountability in clinical risk management and in Continuing Medical Education (CME / CPD Continuing Medical Education and Continuing Professional Development System).

Semester

3rd Year, 2nd Semester

Assessment method

The single final exam has the aim of evaluating the extensive control of the preparation of the program and the evaluation of personal skills about autonomous reflection capacities on critical points of the program.

The achievement of the level of passing of degree is mandatory for all the three teaching modules in order to pass the exam.

The final mark is the result of the sum of the weighted values, with reference to the CFU, of the three modules that compose the class.

The test in oral or written form, by means of quizzes with single and/or multiple answers and open questions with synthetic answers or discussion of cases with ethical implications or professional responsibility. During the Covid-19 emergency period, exams may be in oral or written form and will only be online.
