

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## COURSE SYLLABUS

### Nursing Clinical Methodology

2122-1-I0101D006

---

#### Aims

The course will provide a foundation in knowledge and skills necessary for 1<sup>st</sup> year nursing students to:

- assess, collect, organize, validate and document patient's data;
- recognize the most important nursing problems and state nursing diagnoses;
- focus ethical aspects of nursing practice.

#### Contents

Initial nursing assessment: physical examination, history taking, data collection, validation and diagnostic reasoning, ethical issues of nursing practice.

#### Detailed program

Schools of Lecco, Monza and Sondrio: Nursing assessment is oriented by the **Human Processes Nursing Model (MAPU)**. Diagnosis label statement is oriented by **ICNP® terminology**.

School of Bergamo: Nursing assessment is oriented by **Virginia Henderson's Nursing Theory** (14 fundamental needs in their biophysiological, psycho-socio-cultural dimensions). Diagnosis label statement is oriented by **NANDA-International®**.

By way of example, some diagnostic label will be discussed (class discussion).

## **CLINICAL NURSING**

Introduction to Health Assessment

The Health Assessment Interview and Health History

The Physical Examination

Assessing Respiratory System

Assessing Cardiovascular System

Assessing Nutrition, Fluid and Electrolyte Balance

Assessing Bowel Elimination

Assessing Urinary Elimination
