SYLLABUS DEL CORSO

Analisi Statistica Multivariata

2122-2-E4101B037

Learning objectives

The course aims at introducing multivariate statistical techniques both from the methodological and from the applicative point of view.

Contents

The course is composed of three parts: R for the Multivariate Statistical Analysis (first part, 3 CFU), Exploratory data analysis (second part, 6 CFU) and Statistical models (third part, 6 CFU).

- _____
- _____
- _____

Detailed program

First part: R for the Multivariate Statistical Analysis (3 CFU)

- Introduction to R
- Descriptive statistics with R
- Probability with R
- Inferential statistics with R

Second part: Exploratory Analysis (6 CFU)

- Graphical representation of multivariate data
- Total and generalized variance
- Spectral decomposition theorem
- Principal components analysis
- Cluster analysis: K-means and hierarchical methods
- Factorial analysis

Third part: Statistical Models (6 CFU)

- Simple and multiple linear regression
- Model specification
- Parameter estimation
- Linear hypotheses tests
- Diagnostics
- Variable selection
- Prediction

Prerequisites

Knowledge of the notions given in the courses "Statistics I", "Probability", "Matrix Algebra", and "Statistical inference (Statistics II)" is required.

Teaching methods

Class lectures and lab sessions.

Assessment methods

Students are supposed to pass three written exams (one for each part of the course) and an oral exam (optional). Each written exam consists of questions about theory, numerical exercises and analysis of data sets. The overall mark is obtained by averaging the marks obtained in each part.

Textbooks and Reading Materials

First part: R for the Multivariate Statistical Analysis (3 CFU)

- Lecture notes from the instructor
- -----
- -----

Second part: Exploratory Analysis (6 CFU)

- Lecture notes from the instructor
- Johnson, Wichern (2007) Applied Multivariate Statistical Analysis (6th Edition), Pearson Prentice Hall
- Everitt, Hothorn (2011) An Introduction to Applied Multivariate Analysis with R, Springer

Third part: Statistical models (6 CFU)

- Lecture notes from the instructor
- M. Grigoletto, F. Pauli, L. Ventura, Modello lineare, teoria e applicazioni con R. Giappichelli, 2017

Semester

The course is scheduled in the first semester and in the second part of the second semester.

Teaching language

Italian
