COURSE SYLLABUS

Macroeconomics - 2

2122-2-E1801M005-T2

Learning objectives

The course aims to introduce students to the main topics of modern macroeconomics. In particular, the course after introducing the data and some fundamental concepts of macroeconomics, the course will focus on the theory of the economic cycle as described by the IS-LM model. In this part, great attention is paid to explaining the impact of fiscal and monetary policies. The last part of the course focuses on specific topics such as the stabilization of public debt, the role of technology and the financial crisis.

Contents

Fundamental concepts: the basics of national accounting in an open economy. Unemployment. The role of public policies: the IS / LM model and its applications. Insights: debt, crisis and technology.
