COURSE SYLLABUS

Microeconomics - 2

2122-1-E3301M191-E3301M193M-T2

Learning objectives

The course aims at providing the students with the fundamental conceptual skills necessary for the examination and interpretation of the main economic phenomena. The ultimate goal is the acquisition of abilities related to learning, investigation and analysis, with particular reference to microeconomics. Students will be able to address the specific issues of economic systems, demonstrating an understanding of the concepts contained in the introductory literature, also through the use of models that exemplify the theoretical concepts.

Contents

The course provides an introduction to the main topics of Microeconomics. More specifically, the course will examine the economic behavior of households and firms, the functioning of different types of markets (perfect competition, monopoly, monopolistic competition, oligopoly) and problems related to the absence of markets (asymmetric information, externalities and public goods).

Detailed program

1. The Market Economy

2. Consumer Choice, Comparative Statics and Demand, Price Changes

and Consumer Welfare, The Household as Supplier, Choice under
