Detailed program

- 1) Balance of Payments and the current account
- 2) Forex market, equilibrium conditions (UIP, CIP, PPP)

3) Equilibrium in the foreign exchange market short run vs long run 4) Fixed exchange rates

5) The international financial system

Prerequisites

Teaching methods

Standard lectures

Assessment methods

The assessment is based on a written exam. It is composed of numerical exercises and open questions. Numerical exercises want to test the understanding of the main models explained during the course. The open questions assess the student's ability to make connections between various topics of international finance explained during the course.
