COURSE SYLLABUS

Laboratory 5 - Metodi e casi di analisi delle organizzazioni

2122-3-E1601N084

Learning objectives

The laboratory focuses on the fundamentals and theories of organizational analysis, elements of the complex organization and its resources, through case studies.

The goal is to provide tools to:
1. organizational analysis
2. diagnosis about the organization and its criticality;
3. role analysis.

The mode is teamwork. The meetings will take place in an interactive way: the few moments of lectures will be interspersed by watching movies, commercials, photographs, discussion about the methods and techniques of organizational check-up and analysis of critical issues. Will be stimulated critical analysis of organizational tools.

The Lab will follow a multidisciplinary approach to the organizational analysis approaches All the material required to follow the course is distributed from time to time in the classroom.
