

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Sociologia

2122-2-E2401P068

Learning area

Introductory course to sociological analysis.

The goal is to point out some of its major themes and fields of investigation.

Learning objectives

Knowledge and understanding

Concepts and theories of Sociology

Interpretation of modern society worked out by the founding fathers of Sociology and a very brief overview on some contemporary perspectives

Structures and social change, with a particular focus on citizenship, power, stratification, and social mobility

Role and function of socialization

The social construction of the quotidian

Technologies of everyday life, time-space distancing, and the indirect relations: the mass knowledge society

Applying knowledge and understanding

Ability to apply the sociological perspective in order to describe what happens in everyday life situations

Ability to understand the 'stock of knowledge' used by people during their ordinary affairs

Ability to understand some of the changes in which contemporary societies are involved

Contents

The lectures aim to investigate the taken-for-granted social life; they 'deconstruct' such reality in order to focus on some of the processes by which social life takes place. The course is organized around five main topics: 1) the interpretation of modern society given by the founding fathers of sociology; 2) some of the most relevant sociological categories and research fields – from stratification to social mobility; 3) socialization; 4) the correlation between everyday life and daily experiences of social reality; 5) the role played by the techno-scientific knowledge in daily life routines: that is, the development of the 'mass knowledge society'.

Detailed program

Introduction to sociological epistemology: positivism, realism, interpretative sociological understanding

Modern society and Sociology

Secularization, citizenship, power, and the problem of social order in modern societies

Interpretation of modern society worked out by the founding fathers of Sociology (Functionalism, Durkheim, Marx, Weber)

Very brief overview on contemporary sociological theories: structuralfunctionalism (Parsons, Merton), power and social conflict (Dahrendorf, Collins), the sociology of everyday life (Goffman)

Some themes of sociological investigation: stratification, social inequalities, public policies, social mobility

Socialization and biology

Socialization and the common sense culture

Socialization and the theories of personality (Behaviourism, Mead, Freud, Piaget)

Agencies of socialization

The life course as a socially constructed reality

The investigation of the taken for granted reality of social life

The social 'knowledge' of ordinary life

Body, time, space: three crucial variables of social life

Action, ontological security and social practices

Mass Knowledge Society, time-space distancing, and the indirect relations

Prerequisites

No particular prerequisite.

Teaching methods

Lectures will be held in presence, unless further Covid-19 related restrictions are imposed.

Lectures, text discussions, audio\video materials; small empirical researches are possible.

At the the begining of the course, a detailed program of topics discussed in every lecture will be distributed.

The teaching method and topics discussed focus on the development of synhthesis skills, thus facilitating the practical application of the theoretical concepts.

Lectures and class discussions aim to show how science can be applied in studying everyday situations.

Students are expected to be able to make use of the various topics approached during the lectures in order to describe and understand daily situations, making use of their own indipendent judgement.

Assessment methods

Written (required); oral (optional).

The written exam includes:

1. a section of multiple choice questions (only one is the correct answer); the correct answer is the most complete and logical one from the point of view of sociological reasoning; the alternatives can be in terms of:

1.1. answers that although correct are however incomplete;

1.2. generic or approximate answers;

1.3. false or unlikely answers;

2. a section with open questions.

One can take the oral examination only after having passed the written one. The oral examination (optional) covers the whole program and the final vote is the the average of the written and oral.

Evaluation criteria for both written and oral examination

Appropriate use of technical formal language – scientific formal skills

Logical accuracy in the presentation of topics

Ability to identify the connections between issues

Completeness of the illustration of the topics given the limits of time and available pages (written)

Textbooks and Reading Materials

Although this course is held in Italian, for Erasmus students, course material can also be available in English, and students can take the exam in English if they are interested in doing so.
