Contents

The workshop aims to provide students with the theoretical and practical knowledge about the techniques of Interview and Focus Group, primary tools in qualitative research. Each participant will be asked to conduct interviews and focus group, working in small groups.

Detailed program

The research interview: conceptual and methodological aspects

The construction of a grid of interview

Conducting an interview

The focus groups: conceptual and methodological aspects

The construction of a grid of focus groups

Conducting a focus group

Prerequisites

Nothing specific. A good Knowledge of the basis of Psychology enables a more aware use of the course contents.

Teaching methods

Lessons will be held in presence, unless further COVID-19 related restrictions are imposed.

Brief methodological concepts, films, discussions, realization of interviews and focus groups, group work.

Assessment methods

The evaluation method consists in a written paper that will be discussed orally.

The following evaluation criteria will be used:

knowledge of the interview and the focus group tools;

ability to compare the two tools;

acquisition of skills for the administration of the tools;

ability to deepen, reflect and criticize the work done.

No ongoing tests will be carried out.
