COURSE SYLLABUS

Professional Laboratories 3

2122-3-I0202D037

Aims

By the end of the laboratory, students should have increased the knowledge of their different perceptions

Contents

THE LABORATORY OF SENSES: The Laboratory of Senses is divided into four days, one for each sense (view, hearing, touch, and smell and taste, which are together). The aim of the laboratory is to increase theconsciousness of the students of their different perceptions. On the completion of the module, students will have increased their experiences of each perception, so to be better prepared to an emphatic relation with the patients with sensorial disorders.

Detailed program

THE LABORATORY OF SENSES

The Laboratory of Senses takes four days, one for each sense, (view, earing, touch, smell and taste are together). The aim of the laboratory is to increase the consciousness of the students about their different perceptions. The students will have experiences of each perception, so to be better prepared to an emphatic relation with the patients with sensorial disorders.
