COURSE SYLLABUS

Neurophysiology

2122-1-I0202D139-I0202D141M

Aims

After completing this course, students will have acquired the knowledge and skills of the physiology of higher psychic functions,

Contents

NEUROPHYSIOLOGY: The synapses. The receptors. The proprioceptors. The sensory systems. The resting and action potential. The ion channels. Breathing.

Detailed program

NEUROPHYSIOLOGY

? The synapses

? The receptors

? The muscle-tendon proprioceptors

? The vestibular proprioceptors

? The sensory systems

? Somoestesic sensitivity

? Heat - pain sensitivity

? Sight

? Hearing

? Smell

? Taste

? The resting and action potential

? The ion channels

? Breathing (respiratory system development and control of breath)

Prerequisites

Objectives of the course Bases of Movement

Teaching form

Lectures

During the Covid-19 emergency period, lessons will take place remotely asynchronously or videoconference with some events in synchronously and some in physical presence.

Textbook and teaching resource

1. F. Baldissare, Fisiologia e Biofisica Medica, IV Ed.,Poletto Ed., 2009

Semester

Second Semester

Assessment method

Written exam: quizzes with single / multiple choice and open questions with brief answer.

Final oral exam at the discretion of the teacher or on the student's proposal regarding the project

During the Covid-19 emergency period the exam will take place electronically with proctoring control.
