COURSE SYLLABUS

Bank Management

2122-1-F1601M057

Learning objectives

The course provides students with suitable tools aimed at understanding the main issues of bank strategic management from the point of view of board and top management. The topics refer to the context of EU bank market after the recent financial turmoil.

Part 1 describes the framework of risk supervision (Basel 2 and 3 rules) and other main regulatory issues; An analysis of governance models and internal control system in banking institutions is also provided. In the last sections the course discusses policies and business models in the banking industry, with a specific focus on retail banking; mid-term strategies and strategic goals are examined through the structure and the information of bank's strategic plan.

During the course seminars and cases will be held by banks and practitioners in order to provide the industry's point of view on relevant issues. A section will be also dedicated to the analysis of liquidity risk and liquidity policies.

Contents

INTRODUCTION

Detailed program
