## SYLLABUS DEL CORSO

### Digital Economy

2122-2-F9101Q018-F9101Q019M

---

#### Obiettivi

The course Digital Economy is designed to understand the economic foundations of the new digital world. Moreover, it wants to support students to confidently conceive, lead and execute digital innovation initiatives and develop new business models for existing and insurgent organizations.

The digital revolution is rapidly transforming the fundamental nature of many companies in a wide range of industries: students need to understand the economics, technology paradigms and management practices of innovating in digital-centric businesses to ensure corporate and personal success.

The course is intended for students pursuing careers in which digital technologies will be critical to the development of new products and services, e.g., entrepreneurial start-ups, consulting, and R&D, as well as positions in marketing, operations, and strategy inside larger enterprises.

#### Contenuti sintetici

Specifically, the course will help students learn:

- the economic and technological factors that are at the heart of the digital revolution taking place in the economy
- examining the nature of information as an asset, and defining the laws that govern its behaviour as an economic good

- the clash between existing business models and new digitally enhanced and led business models emphasizing platforms and ecosystems
- the competitive interactions among firms with different digital business models
- how to best organize and lead product and service innovation initiatives in the digital space and how to leverage on what you learnt to be successful in the professional world.

## Programma esteso

### Lecture 1 – 9<sup>th</sup> March 2022 (8.30-10.30)

-----

-----

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

### Lecture 2 – 10<sup>th</sup> March 2022 (8.30-11.30)
