

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Biostatistica (blended)

2122-1-F0901D043-F0901D086M

---

#### Aims

Basic knowledge of the most important statistical-methodological tools of the descriptive and inferential statistics for: design of experiments, data collection and analysis, the complexities of lab data.

The student will be able to: understand the main concepts of study design, implement statistical analysis, read the scientific literature presenting descriptive and inferential statistic results.

#### Contents

The goal of the course is to contribute to the education of the medical biotechnologist in order to be able to:

- understand the principles of the experimental design in medicine and biology
- understand the most important statistical techniques for data analysis
- understand the specificities of the lab data
- use a software for data analysis (additional)

#### Detailed program

The module is organized as follows:

Part one

Introduction, basic definitions and notation, type of studies (i.e. study design)

#### **Part two**

Basic descriptive statistics, graphical representation of quantitative and qualitative variables, indicators of position and variability

#### **Part three**

Basic probability theory, binomial and gaussian distributions, sampling distributions

#### **Part four**

Basics on inferential statistics, point estimated on mean and proportion, hypothesis testing on mean and proportion, hypothesis testing on studies on the comparison of two samples, analysis of contingency tables (supplementary)

#### **Part five**

Statistics with Lab data: lessons from the interaction with a former student in medical biotechnologies (now researcher)

#### **Software**

The student may use the STATA software (licenza di ateneo) for data analysis (not mandatory)

### **Prerequisites**

Specified in the syllabus of the course.

### **Teaching form**

Specified in the syllabus of the course.

### **Textbook and teaching resource**

Specified in the syllabus of the course.

### **Semester**

Specified in the syllabus of the course.

### **Assessment method**

Written test

- The written exam takes place on the university's esameonline platform [\\_\\_\\_\\_\\_](#)

- 10 questions with 4/5 answers of a calculation required
- 30 minutes
- 3 points scored for each question, oral question for 30 cum laude

## **Office hours**

Specified in the syllabus of the course.
