COURSE SYLLABUS

Market Research

2122-2-F8204B008-F8204B011M

Learning objectives

Performing a market analysis means considering a variety of practical and technical aspects related to business environment and to quantitative measurement applied in real contexts. The discipline employs tool typical of multivariate statistics (such as factorial analysis, classification, forecasts), to develop marketing strategies for shops, to plan specific actions for clients segments and to make brads positioning of market competition. The course aims to guide the student in the selection and learning of statistical tools, with a focus on the interpretation of results in a marketing perspective
