## **Detailed program**

### **Detailed program**

The process of globalization of markets has given a strong impetus to the product "tourism", expanding the range of resources and requiring those who work in the sector to update skills and competences increasingly. Tourism is one of the leading sectors of the Italian economy and will become increasingly important with the increase in leisure time and geographical mobility of people. The growth of the sector offers significant employment opportunities but also requires the training of qualified operators, able to understand and deal with a very competitive market. Faced with an increasingly complex and competitive professional environment, in a world in which consumers / tourists require new and customized products, tourism enterprises are facing changes in cultural innovation, organization and management in order to maintain their competitive advantage. The hospitality world must adapt to the constant demand for improvement of quality of service and must be capable of measuring the effectiveness and efficiency of the management systems used in a perspective of growth and development. The course of study will lead students to learn how to manage and organize cultural and tourist services, with a particular focus on territoriality, its

communication to sustainable tourism. The mastery of the English language enables students to enhance their professional validity at national and international levels.
