SYLLABUS DEL CORSO

Laboratorio Metodi e Tecniche di Intervento per la Promozione del Benessere

2122-2-F5106P023

Learning area

Experiential learning

Learning objectives

Knowledge and understanding

- Current issues in well-being promotion
- Difference between well-being promotion and maladjustment prevention.
- Specific nature of methods and instruments of well-being promotion

Applying knowledge and understanding

- Ability to perform demand analysis
- Ability to identify proper methods and techniques to specific targets
- Ability to identify proper methods and techniques to specific objectives

Contents

The laboratory presents some techniques to be used in the domain of wellbeing promotion.

Detailed program

- Salutogenesis and wellbeing
- Wellbeing survey
- Promoting wellbeing and its resources

Prerequisites

None in particular. The attendance at the course "Psychosocial intervention for wellbeing promotion" is recommended

Teaching methods

The methodology used in training sessions is consistent with a maieutic approach. Each student will therefore have the opportunity to experiment in action. There will always be a sharing and a cognitive-experiential group listening and a theoretical-methodological systematization of what has been experienced.

Assessment methods

During the workshop, students are going to experience some methods and techniques for well-being promotion and to realize independently a short intervention. To receive the approval students are required to attend 75% of the lessons, perform the proposed techniques and deliver the file containing the report related to the intervention.
