DEGLI STUDI DI MILANO-BICOCCA

## COURSE SYLLABUS

### Social Cognition

2122-2-F5106P011

---

#### Learning area

Social psychology, economic psychology and decision-making.

#### Learning objectives

##### *Knowledge and understanding*

- Theories and methods in social cognition
- The role of cognitive processes in shaping person and group perception
- Cognitive biases and social interactions

##### *Applying knowledge and understanding*

- Critical review of theoretical models
- Building methodological skills through practical exercises and group works

#### Contents

The purpose of the course is to develop an understanding of social perception, cognition and impression formation through examining recent research.

## Detailed program

- Theoretical background and key concepts
- Automatic versus controlled processing
- Methods in Social Cognition
- Impression formation
- Social categorization
- Stereotyping
- Cognition and behavior

## Prerequisites

None in particular. However, a good knowledge of the foundations of social psychology enables a more informed understanding of the course contents.

## Teaching methods

Teaching methods include the use of lectures, films, discussions and practical exercises. All course materials will be available on the e-learning platform.

Lectures will be held in presence, unless further COVID-19 restrictions will be released.

## Assessment methods

Oral test. Questions are aimed at assessing the effective acquisition of both theoretical knowledge and methodological skills. The answers to each question will be evaluated in terms of correctness of the answers, argumentative capacity, synthesis, ability to form links among the different areas, and the ability to critically present the phenomena.
