Prerequisites

None.

Teaching methods

Alongside the lectures, the course includes meetings with corporate witnesses, different experiences of instrumented participation, in groups, in the contribution of knowledge and method.

The course is oriented both to theoretical research and professional practices.

All materials (e.g., slides, database) are made available on e-learning.

Lessons will be held in presence unless further COVID-19-related restrictions are imposed.

Assessment methods

People who have participated in the group research will be asked to:

- produce and present a group research, the research will be graded
- support an oral test on the topics covered in the course

For those not attending the exam, it will be oral only and a series of questions will be proposed:

- evaluate the understanding of the topics addressed in the course
- verify the completeness of the study
- make connections between theory and practice
