SYLLABUS DEL CORSO

Genetica Medica

2122-1-K0101D004-K0101D016M

Aims

The purpose of the course is to present the most recent advances in medical genetic research. The course, that is part of the Methodology of Research teaching, aims also to discuss examples of research and to evaluate methods, results and main implications for nursing and midwifery research and practice.

Contents

To know the recent advances of research in the specific clinical area.

To identify implications for nursing and midwifery research.

Detailed program

Recent developments in medical genetic research.

Methods and tools used in medical genetic research.

Implications for research, even nursing and midwifery research, in the field of medical genetics.

Prerequisites

Defined by the Degree Regulation.

Teaching form

Lectures and class discussion.

Due to the COVID-19, lessons could be provided with the following approaches: in presence, partially in presence, on-line synchronous and asynchronous.

Textbook and teaching resource

No books but research papers chosen by teachers are presented and discussed during class.

Semester

First year, second semester

Assessment method

The examination is not for the single module but it is an integrated examination for the whole course, as described in details in the Syllabus of the Course.

Office hours

Agreed by e-mail with teacher.

Due to the COVID-19 emergency tutoring will be in presence or on-line by Webex.
