UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Macroeconomics - 1

2122-2-E1803M101-T1

Learning objectives

Introduction to basic macroeconomic issues such as growth, inflation, unemployment, interest rates and monetary policies, exchange rates, budget deficits and public debt.

Knowledge and understanding of the functioning of the economic system in the short- and long-run through basic macroeconomic models (IS-LM and AD-AS) in open and closed economic systems.

Contents

The course provides a comprehensive analysis of modern macroeconomics under the assumption of "open economy", i.e. that econonomic systems are highly integrated each other. The course also provides an explanation of the functioning of the economic system in the long- and short-run, as well as of the most important bilding blocks of macroeconomics. During the course, special emphasis will be devoted to the anasysis of financial activities and the banking system.

Detailed program

- Introduction to macroeconomics
- The Macroeconomy in the long-run

- The Macroeconomy in the Short Run: the Building Blocks

- Macroeconomic Equilibrium
- Macroeconomic Policy in a Global Economy
