## SYLLABUS DEL CORSO

### Cinema e Arti Visive

2122-3-E1901R085

---

#### Course title

CINEMA E ARTI VISIVE

Introduction

The course introduces the students to the study of cinema and the basic knowledge of film language. The experience privileges the study of early silent film from the origin of cinema and arouses interest toward the film cultural heritage of national and international cinematography.

The course presents the history of the motion pictures technologies, including the pre-cinema devices, and the theme of human vision and the theories of the visual perception. Special attention will give to the pioneers of the history of the cinema and their early silent movies.

This pathway offers the experience of cinema from a new disciplinary approach, and it enhances the pedagogical value with regard to the introduction of cinema culture at school. Especially how the teaching and learning the film analysis language is a significance experience on digital education in educational contexts with the use of an interdisciplinary approach.

#### Topics and course structure

The course introduces the students to study cinema and the basic knowledge of film language from the origin of cinema.

The intention is to highlight the educational value of the movie's screening. This experience privileges the critical attitudes on the analysis of film, language used as didactic resource and tool.

The course presents the history of the technology of the motion pictures, including the precinema devices, the human vision and the theories of the visual perception. Special attention will be given to the pioneers of the history of the cinema and their early silent moving images.

During the screening of the early film, the students start, an easy learn road map on film language and an application analysis.

The selection of contents, showed in these early films, drives the study and the analysis of film language through an interdisciplinary approach.

Following the principals themes treated during the course:
