#### Course title

SOCIOLOGY OF BUSINESS INNOVATION

# **Topics and course structure**

Within the complex economic dynamics that characterize contemporary society, scientific and technological knowledge is one of the key factors of competitiveness. In order to fully exploit the possibilities for development, it is necessary that this knowledge does not remain confined to laboratories and research centers, but spreads in the economic and social context, gaining strength and generating innovation. A key factor in the mechanisms of knowledge transfer is represented by human capital, that is, by the presence of professional figures able to operate in the boundary areas between science, economy, and society, addressing the management problems related to the generation, selection, development, and implementation of innovation in organizations.

The course aims to present the most relevant models of innovation and discuss the systemic approach to innovation, with the goal of contributing to the development of specific skills with respect to theoretical models, tools and methods for the management of organizational change, one of the fundamental aspects of the Master's Degree in Training and Development of Human Resources.

# **Objectives**

Through the attendance of the lessons and the analysis of the texts indicated, the course of study intends:

•
At the end of the course, students will have acquired the following specific skills:
Methodologies  The teaching methodology used combines different tools:
In the Covid-19 emergency period the lessons will be held remotely asynchronously with synchronous videoconferencing events.
Online and offline teaching materials
Programme and references for attending students
Also in the Academic Year 2021/22, as the situation does not allow the full return to normal teaching activities there will be no distinction between attending and non-attending students.
Required text:

Students must then select 4 texts of their choice from the following:

- 1. Porter M.E., (1998), "Clusters and the new economics of competition", Harvard Business Review, p. 77-89, Nov-Dec.
- 2. Monaci, M. (2012). L'innovazione sostenibile d'impresa come integrazione di responsabilità e opportunità sociali, Studi organizzativi, 2, 26-61.
- 3. De Marchi, V., Di Maria, E., & Spraul, K. (2018). Collaborazioni università-impresa: i risultati sul fronte dell'eco-innovazione. ECONOMIA E SOCIETÀ REGIONALE, 62-72.
- 4. Narula, S., Puppala, H., Kumar, A., Frederico, G. F., Dwivedy, M., Prakash, S., & Talwar, V. (2021). Applicability of industry 4.0 technologies in the adoption of global reporting initiative standards for achieving sustainability. Journal of Cleaner Production, 305, 127-141.
- 5. Reis, J. S. D. M., Espuny, M., Nunhes, T. V., Sampaio, N. A. D. S., Isaksson, R., Campos, F. C. D., & Oliveira, O. J. D. (2021). Striding towards Sustainability: A Framework to Overcome Challenges and Explore Opportunities through Industry 4.0. Sustainability, 13(9), 5232.

#### **Assessment methods**

For the academic year 2021/22 there are no different exams for attending and non-attending students.

The exam consists of a written test in which the student will be asked to demonstrate the acquisition of the knowledge discussed during the course and present in the bibliography, through open questions.

The evaluation of the result of the paper is based on the mastery of the concepts and issues related to innovation addressed during the course and the ability to discuss cases and problems present in the bibliography. In addition to mastering the ability to argue the different paradigms, research perspectives, and operational tools, appropriate use of sociological vocabulary, clarity of exposition, and the ability to analyze and critically evaluate will be part of the assessment.

#### Office hours

The office is held by appointment.

Contact the professor by email: davide.diamantini@unimib.it

### **Programme validity**

The programs are valid for two academic years.
