SYLLABUS DEL CORSO

Strategic Management

2122-1-F7702M070

Learning area

Learning objectives

The course of Strategic Management introduces students to the analytical tools required to understand firm behaviour and strategic interaction in different markets. The course studies competitive strategies and entrepreneurship with a particular attention to global market and is structured in two modules :

- 1) Competitive Strategy
- 2) Innovation Management and Entrepreneurship

Competitive Strategy

At the end of the first module students will acquire the core concepts and analytical tools needed to understand the competitive environment and to thrive in global markets.

Innovation Management and Entrepreneurship

At the end of the second module, students will acquire core concepts and analytical tools required to understand how to manage technical and market change in established firms and new enterprises.

Contents

The program of the first module offers an overview of firm market strategies, by providing students with the analytical tools needed to understand competitive strategies, corporate strategy and international business strategies.

The program of the second module focuses on the creation and maintenance of competitive advantage in conditions of rapid technical and market change. This topic is treated by analyzing: (a) the innovation strategies and business models of market leaders and followers; (b) the business plan of new enterprises.
