SYLLABUS DEL CORSO

Business Analytics

2122-1-F7702M032-F7702M114M

Learning objectives

The main objective of this module will be to learn how to apply quantitative methods to analyse data and support a data-driven decision making.

Contents

This module will cover four main themes: the firm in the global market, the innovation-performance link, M&A and inter-firm alliances and collaboration, and internazionalization. For each of these themes, the module involves an introduction to the relevant issues, a focus on research questions and/or hypotheses that data could answer, an overview of data sources (the type of data available or potentially available, collection and cleaning), and the analysis of data (visualizing data and descriptive statistics, multivariate analysis or other suitable methodologies, and interpretation of results).

Detailed program

1. The firm in the global economy:
 1. The importance of geography in the global economy
 2. The role of proximity

2. Innovation and performance
 1. Type of innovation and indicators
 2. The linkage between innovation and measures of performance
3. Firm boundaries
 1. Open innovation
 2. Alliances and collaboration
4. Internationalization
 1. Factors influencing location choices
 2. The role of distance factors

Prerequisites

None

Teaching methods

Lectures, laboratory, group work.

Lessons will take place in presence, with synchronous videoconference.

Assessment methods

Class participation, final short essay with a presentation to the class (group work), and individual oral exam.

Textbooks and Reading Materials

Cameron, A.C. & Trivedi, P. K. (2009) Microeconometrics using Stata. College Station: Stata press.

Articles, databases, and other relevant sources will be available during the course.

Semester

Second semester

Teaching language

English
