COURSE SYLLABUS

Turno G - Invecchiamento della popolazione e politiche sociali

2122-2-F8701N033-TG

Learning objectives

Specific objectives of the course are to highlight, on the hand, the changes that have taken place in the last decades at the demographic and family level with particular reference to the elderly population and, on the other, the specificities and the problems of social policies aimed at this population.

Contents

Demographic and family changes from the second half of the 1900s and aging.

Change in care models.

Detailed program

Demographic changes from the second half of the 1900s and aging;

The specificity of the Italian case; data and indicators.

Aging, pathologies, non self-sufficiency, gender differences and role of socio-cultural characteristics.

Changes in family typologies and parental networks.

The evolution of the pension system.

Social policies for the elderly population.

Change in care models and the specificity of the Italian situation.

Prerequisites

Knowledge of the main demographic indicators and the main changes in the last decades.

Teaching methods

Interactive lessons, also starting from the students' knowledge and specific cognitive interests.

Assessment methods

Oral exam, also starting from the eventual presentation of the students' paper.

Textbooks and Reading Materials
