English

Breve descrizione

The course will be programmed through lessons in presence. If necessary, online, synchronous webex lessons, will be given online. Recordings of the lessons will be made available as well

- How to read a scientific paper
- The “write first-do-the-experiments-later” approach
- How to structure a scientific paper
- Hands-on and practical exercises: students will be asked to perform some tasks. By way of example, they will write an abstract, a cover letter or an introduction of a paper according to some specific suggestions

and the material prepared by a few randomly selected students - will be read and commented

If possible, a lecture will be given by an editor of a journal of the *Nature* group

Target audience: The proposal is addressed to students of the science and medicine area. _____

Participants (min/max): About 10-50 students
