COURSE SYLLABUS

Scientific writing in human and social sciences

2122-DOTT-MOD22

Title

Scientific writing in human and social sciences

Teacher(s)

Prof. Guido Veronese - "Riccardo Massa" Department of Human Sciences for Education

Language

English

Short description

The module is aimed at introducing the very fundamentals of scientific writing. From how to select an excellent outlet to the correct ways how to produce an abstract (structured and unstructured) and a concept note or proposal scientifically sounding.

Methodology

- Reflective discussion

- Work in small groups
- Students' short presentations
- Online searching and interactive experiencing
- Frontal lecture

Students will be evaluated during the last "Assignment" lecture

Lecture 1.

Selecting papers and journals through databases

Analysing papers' structures

Lecture 2

Writing structured and unstructured abstracts

Lecture 3

Writing a proposal throughout FINER and TOTE criteria

Lecture 4

Assignment: structuring a concept note

Strongly recommended for students of human and social sciences (Psychology, Education, Anthropology, Asep). Some glimpse on bibliometric and not bibliometric approaches will also be provided.

Participants (min/max): 10-35

CFU / Hours
