COURSE SYLLABUS

Cultural aspects of the climate crisis: meanings, denials and desires of environmental relatedness

2122-DOTT-MOD4

Title

Cultural aspects of the climate crisis: meanings, denials and desires of environmental relatedness

Teacher(s)

Prof. Mauro Van Aken

Language

Italian, but if foreign student (non-italian speaking) present, english

Short description

Climate changes are a geophysical dynamic, but represent a very cultural and social issue, in their impacts, causes and challenges. Departing from anthropological perspective, combined with tools of the human sciences, we will analyze together the multiple cultural and symbolical aspect of environmental relatedness and of the emotional and “unthinkable” aspects of the climate crisis

Target audience: Transversal to all schools of PhD

Participants (min/max): 20 max

Reference book: Van Aken, Campati per aria, eleuthera, 2021
