

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Psicometria 2

2122-2-004P002002

Learning objectives

- Understanding sampling mechanisms, and its implications.
- Understanding the fundamentals of inferential statistics.
- Learn about the specific needs of single case studies and dedicated techniques
- Learn about the specific needs of large sample studies and a dedicated specific technique
- Learn the basics of using dedicated Open Access statistical software.

Contents

First module: Sampling.
Problems and possible solutions.
What does it mean to sample
Determine the sample size of a study

Second module: Special needs.
Techniques for Single Case Studies. Statistical models for the study of the single case
Techniques for large samples. The use of networks in observational studies

Transversal: Bases for the use of JASP and JAMOV analysis software

Textbooks and Reading Materials

There is no reference text. The material is made available on the e-learning page
