NMR spectroscopy of molecular Inorganic and Organometallic Compounds

#### Docente(i)

prof. Roberto Della Pergola

#### Lingua

English (or Italian in case of full consensus among participants)

#### **Breve descrizione**

The course will focus on	1H, 13C	and other	less	common	NMR	active	nuclei	(31P,	19F,	15N,	195Pt).	It will	alsc
deals with band shape an	alysis,	the personal ratio and											

Objectives of the lectures is to show what information can be obtaining

Evaluation: NO

#### CFU / Ore

1 CFU - 8 hours (Lecture)

### Periodo di erogazione

I semester
