Geophysical Fluid Dynamics

Teacher(s)

Claudia Pasquero

Language

English

Short description

Different aspects of geophysical fluid dynamics will be discussed in a reading class based either on a book or on a series of scientific papers, based on participant interests. As examples, possible topics for the whole class are:

- -Atmosphere and Ocean Dynamics
- -air-sea interactions
- -turbulence in geophysical flows

Evaluation: YES, PhD students will have to discuss specific aspects of the topics covered during the course.

CFU / Hours

1 CFU - 12 Hours

Teaching period

I & II semester
