Diagnosis-occluded posturale.La diagnosis in orthodontics. The clinical examination; instrumental examinations. The cephalometric diagnosis, the importance of the footprints, the development of models of plaster; fundamentals of orthodontic therapy, the instruments in orthodontics, and the indirect and direct bonding; characteristics of apparecchiature ortodontiche. The indirect and direct bonding; characteristics of orthodontic appliances furniture; characteristics of fixed orthodontic appliances; serial extractions in patient management in growth: the movement dental dental, biological basis and the treatment of the adult patient and the treatment of the first classes; treatment of the second class, third class treatment;. restraint and relapse concepts of Posture; genetics in orthodontics, the anchorage in orthodontics.

Prerequisites

Completion of the examination in General Dentistry Disciplines

Teaching form

Clinical mentoring and oral lessons

Textbook and teaching resource

Foundamentals of Operative Dentistry- A contemporary approach SUMMIT-ROBBINS Orthodontics current principles and techniques GRABER -VANARSDAL

Semester

First and second semester V year

Assessment method

Oral and written examination verifying competences and skills acquired during the course

Office hours

Monday -Friday 830-900
