## SYLLABUS DEL CORSO

### Pharmacology

2223-5-H4102D043-H4102D144M

---

#### Aims

Main aim of the course is to provide students with gastrointestinal pharmacology. The course will present and describe available pharmacological strategies for the treatment of gastric pathologies (gastric acidity, ulcers, esophageal reflux), gastrointestinal motility, emesis, hepatic and pancreatic diseases, gut inflammation. Mechanism of action, therapeutic properties, drug interactions, and side effects will be presented.

#### Contents

Main classes of drugs, mechanisms of action, drug interactions and precautions.

#### Detailed program

Drugs for the treatment of gastric acidity, peptic ulcer, esophageal reflux.

Drugs for the control of gastrointestinal motility: prokinetics and treatment of stypsis and diarrhea.

Drugs for the treatment and prevention (vaccines) of hepatic and pancreatic diseases.

Anticancer drugs for the treatment of gastrointestinal neoplasia.

Work in groups: Innovative vaccines/anticancer drugs.

## **Prerequisites**

Propaedeutic skills

## **Teaching form**

Frontal lectures

In the event of pandemic emergency period, the lectures will be held remotely by synchronous online videoconference

*All course activities will be held in English language*

## **Textbook and teaching resource**

Bertram G. Katzung "Basic and clinical pharmacology" 14th Edition. LANGE

Goodman & Gilman "The Pharmacological Basis of Therapeutics" 13th Edition, Laurence L. Brunton, Randa Hilal-Dandan, Björn C. Knollmann. McGraw-Hill Education

Rang & Dale "Pharmacology" 14th Edition, Elsevier.

## **Semester**

Second

## **Assessment method**

Multiple choice test

Oral examination on the topics covered during the lectures, discussion on clinical problem solving and clinical case analysis

All assessments will be done in English language

## **Office hours**

On appointment

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
