

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## COURSE SYLLABUS

### Biochemistry

2223-4-H4102D028-H4102D103M

---

#### Aims

To understand the biochemical pathways underlying the CNS metabolism under physiological conditions. To understand how derangement of metabolism can affect CNS functions. The course will focus on the biochemical and metabolic changes occurring in pathological conditions.

#### Contents

Metabolism of CNS (saccharides, proteins amino acids, lipids). Biochemistry of the blood-brain barrier. Metabolic changes in pathological conditions. Nutritional aspects.

#### Detailed program

Metabolism of CNS (carbohydrates, proteins amino acids, lipids) in physiological conditions. Biochemistry of the blood-brain barrier. Metabolic changes in neurodegenerative diseases. Metabolic changes in brain tumours. Metabolic changes in ischemia-reperfusion injury. Nutritional aspects.

#### Prerequisites

Basic knowledge of biochemistry, biology and chemistry.

## **Teaching form**

Frontal lectures that require the active participation of students who will be involved in the subject by proposing group work, calculations and discussion of problems related to the change of body metabolism in different conditions. Frontal lessons and self-assessment tests. In the case of emergency lessons will be performed remotely using Cisco-webex platform following the Ateneo's rules.

## **Textbook and teaching resource**

Biochemistry with clinical cases . T. Devlin; Biochemistry, Berg et al.

Scientific papers/reviews, slides and materials used during frontal lessons. All the materials will be loaded on e-learning platform.

## **Semester**

second semester.

## **Assessment method**

Written exam: 10 multiple-choice questions together with the other modules of the NVT.

The questions proposed in the written exam will be constructed in such a way as to induce the student to biochemical-clinical reasoning, to understand the units of measurement and to be able to evaluate the skills and competences acquired according to the objectives of the course.

## **Office hours**

on appointment to francesca.re1@unimib.it

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
