DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Genetics II

2223-1-H4102D002-H4102D009M

---

#### Aims

Understand the methods employed in genetic analysis and their applications both within families and in the general population.

#### Contents

Learning of the most common molecular biology techniques

#### Detailed program

In this part students will perform "hands on" laboratory work. In particular they will learn:

DNA or RNA extraction

PCR and agarose gel electrophoresis

(Note: activities in attendance, subject to any ministerial changes following the COVID pandemic situation)

#### Prerequisites

Basic sciences (chemistry, physics)

## **Teaching form**

Laboratory work

## **Textbook and teaching resource**

Thompson & Thompson Genetics in Medicine, 8e, 2015, reviews

## **Semester**

Second semester

## **Assessment method**

Evaluation of the lab performance

## **Office hours**

By appointment

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
