SYLLABUS DEL CORSO

Tirocinio Professionalizzante Area Medica 2e

2223-4-H4101D328-H4101D151M

Aims

The aims of the training period in Clinical Area 2 are to enhance the students' knowledge acquired during Medicine Training 1. By the end of this course, students will have to be able to identify the different phases of the diagnostic/therapeutic process in the different areas of internal medicine. The training program is performed with the help of a tutor who will follow the students through the steps of the process

Contents

To carry out a medical investigation, to make a critical argument as regards the laboratory tests, to apply the dialogue skills with the patient, to learn how to establish a good relationship with the patient, to learn how to use the right criteria of professional ethics

Detailed program

The student participates in the morning briefing and the discussion of the cases of hospitalization, assists in decision-making processes related to the choice of antimicrobial therapy, supports the doctor during the visit. The student participates in the collection of anamnestic data and in the execution of the physical exam
