SYLLABUS DEL CORSO

Tecniche di Comunicazione

2223-2-H4101D254-H4101D172M

Aims

The aim of the course is to enable students to communicate properly with patients, following the recognized guidelines, with humanity and sensitivity, in the different situations and with different types of patients; students will learn how to manage patients' reactions to the disease and to regulate their own behavior and their emotional reactions in the professional interactions with patients and colleagues

Skills to be acquired (in particular through the activities carried out in small group):

to manage non-verbal communication, gestures and attitudes in interpersonal relationships;

to be able to regulate the emotions of the patient, of his relatives and of the clinician in the treatment process;

to formulate possible training and communication strategies to improve treatment compliance;

to communicate with patients and relatives taking into account the socio-cultural elements that characterize the relationships between people;

explaining the patient (real or simulated) preventive health contents effectively (smoking, alcohol, psychotropic substances, nutrition and other more common health problems)

Contents

Essential of medical interview; giving information effectively; Psychological and relational elements in the patient-doctor relationship; therapeutic alliance; communication skills; verbal and non verbal communication; disease-centred medicine and patient-centred medicine; Calgary Cambridge Model
