SYLLABUS DEL CORSO

Musica e Didattica della Musica con Laboratorio

2223-5-G8501R028

Course title

Music as a lifelong learning opportunity.

Topics and course structure

Music moves us – that is obvious. Far less obvious, however, is to understand and express *how that happens* within a single piece. Thus, analyzing a piece with regard to its expressive value, means to understand this piece, both as a whole and in every detail. The course will focus on a piano piece where music conveys emotions in a rich, sophisticated and surprisingly intense way.

Objectives

The aim of the course is to increase students' awareness of the musical language, of its expressive powers, and of the relationships between structure and emotions. All this will be meant as a possible standpoint on musical education and didactics.

Methodologies

The course will be held in Italian.

The course is conceived and held as an highly interactive workshop. The teacher will play the piano pieces

extensively, asking students to express their impressions that he, in turn, will discuss, refine, and connect, leading the audience to the next listening occasion and so on, in a circular process of construction of a shared knowledge.

Online and offline teaching materials

Listening experience during lessons.

Records of lessons.

Notes.

Supplementary listening.

References, put together during the course.

Concert-lectures held by the teacher, available on line.

Further materials, agreed between teacher and students.

Programme and references for attending students

On account of the radically interactive approach to the matter, references, and musical pieces to listen to, will be indicated during the course, taking into account the main topics arisen during the discussion process.

Programme and references for non-attending students

Non-attending students can choose between three different programmes:

1 On-line video course 2019-20
