SYLLABUS DEL CORSO

Approccio al Dolore in Riabilitazione

2223-3-I0201D143-I0201D223M

Aims

- to recognize the different pain types and mechanisms
- to understand the principles underpinning exercise physiology IASP guidelines in musculoskeletal assessment
- to understand the principles underpinning exercise physiology

Contents

- different pain types according to IASP definition
- different pain mechanisms according to IASP definition
- integration of clinical sensory testing in musculoskeletal assessment
 - implications for rehabilitation
- strength training programming

Detailed program

- assessment and management in musculoskeletal rehabilitation

- quantitative and clinical sensory tests in rehabilitation
- principles of exercise physiology and integration of strength training in rehabilitation
- stratified model of care

Prerequisites

Teaching form

Lessons in attendance, clinical case discussion, small group work, subject to any changes following the pandemic.

Textbook and teaching resource
