DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Neuroanatomia 2

2223-1-I0201D131-I0201D193M

Aims

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system

Contents

The course will provide the anatomical basis to understand the functional organization of the peripheral nervous system (somatic and autonomic)

Detailed program

Organization of the autonomic nervous system, ortosimpatic, parasimpatic

Spinal nerves: origin, ourse, innervation territories

Plexi and spinal nerves: peripheral trunks and constitution - encephalic nerves: origin, course, innervation territories.

Radiologic anatomy, topographic and clinic of the peripheral nervous system

Prerequisites

College-level scientific knowledge

Teaching form

Lectures.

Lessons will be in presence, unless otherwise provided by any ministerial changes following the COVID pandemic situation.

Textbook and teaching resource

- A. Vercelli, Anatomia Umana Funzionale, Minerva Medica
- Martini, Anatomia Umana, Edises

Semester

2nd term

Assessment method

Multiple choice written test, with the possibility to assess the level of competence by means of oral examination.

Office hours

Mon-Fri by appointment
