COURSE SYLLABUS

Sociology

2223-1-I0101D007-I0101D020M

Aims

Sociology

These Lectures aim to introduce students to the comprehension of some basic processes by which everyday life takes place. Society is an 'artificial' entity coming from conventions, routines and behavior patterns; it deals with the 'reality' of life day by day. So, this explains why we are interested in focusing on the dimension of everydayness. Finally, the lectures end with a special consideration of the relation between social inequalities and people's health.

Contents

History of sociology
Perspectives on sociology
Health and everyday life
Health inequalities

Detailed program

Prerequisites

No particular prerequisite

Teaching form

Lectures, text discussions, audio\video materials
