SYLLABUS DEL CORSO

Infermieristica in Chirurgia Specialistica

2223-2-I0101D012-I0101D040M

Aims

General objective: at the end of the course the student will be able to draw up nursing care plans for the person undergoing specialist surgery.

Intermediate objectives: at the end of the course the student will be able to describe, for some clinical pictures referring to the above mentioned specialty: the most frequently detectable data; the characteristic nursing diagnoses; the main nursing interventions.

Contents

The course aims to give elements to provide nursing to patients undergoing to surgical interventions in different fields: Thoracic, Gynecological, Heart, Vascular, Abdominal Surgery, Urology, Neurosurgery, Otorhinolaryngology, Bariatric Surgery, Vulnology, Maxillo-facial surgery

Detailed program

Nursing care:

- to the person undergoing chest surgery;
- to the person with chest drainage;
- the person undergoing gynaecological surgery and the person with problems related to physiological and surgical menopause;

- the person undergoing myocardial revascularization surgery;
- the person undergoing cardiac valve replacement surgery;
- the person with intestinal ostomy;
- the person undergoing a cardiac transplant or with a "left ventricular assist device (LVAD)" installed (basics);
- the person with urinary derivation;
- the person undergoing nephrectomy;
- person undergoing prostate resection surgery and urological surgery in man (testicular and penis diseases);
- the person undergoing intracranial surgery;
- laryngectomized person;
- the person undergoing tonsillectomy.
- the person undergoing bariatric surgery
- to the person undergoing maxillo-facial surgery.

Insights into the following techniques:

- chest drainage management;
- management of intestinal and urinary stomas;
- performing colostomy irrigation;
- execution of bladder autocatheterization;
- Testicular self-examination and male genital self-examination;
- management of continuous bladder washing;
- Intracranial Pressure (PIC) detection;
- management of external (DVE) and internal (DVI) ventricular derivation (hints);
- tracheostomy management;

Prerequisites

Defined by the academic regulations.

Teaching form

Lecture with presentation of clinical nursing cases, videos, demonstrations.
