DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Tecniche e Traccianti in Scintigrafia

2223-3-I0303D036-I0303D085M

---

#### Aims

The student should know the principal diagnostic techniques used in conventional Nuclear Medicine

#### Contents

The course aims to provide knowledge of the principal diagnostic techniques used in conventional Nuclear Medicine

#### Detailed program

Conventional Nuclear Medicine techniques; logistic organization of a Nuclear Medicine Department; layout of a hot lab and radioisotope management. Radiopharmaceutical labelling and relative quality controls. Administration modalities and acquisition protocols (planar and tomographic) of the principal Nuclear Medicine techniques

#### Prerequisites

#### Teaching form

Exercises

## **Textbook and teaching resource**

The Teacher will provide educational materials

## **Semester**

First semester

## **Assessment method**

The **written test** includes 25 multiple choice questions (1 correct answer among 5 options) about all the topics of the course. The written test is evaluated with a mark ranging from 0 to 30. If the mark is superior to 18/30, the oral test will follow.

The **oral test** consists in the evaluation of the knowledge acquired among the course topics through open questions, possibly related to the mistakes made during the written test.

## **Office hours**

By appointment required by mail

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
