

UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Malattie del Sangue e del Sistema Immunitario

2223-2-I0301D007-I0301D029M

Aims

The student must be able to:

-Characterize the blood cellular and biochemical composition and describe the principal diseases of the hematological, immunological and coagulation systems

Contents

At the end of this course, the students must have learned about the consequences of an altered function of the hematopoietic, immunologic, and coagulation systems.

Detailed program

BLOOD AND MORPHOLOGY OF BLOOD CELLS. Blood composition and the morphological characteristics of blood cells. Hematopoiesis and hemocatheresis. Pathophysiology of leukocytes, red blood cells, and platelets. Stem cell characteristics and properties. Plasma composition. Mechanisms of blood coagulation activation and inhibition. BLOOD DISEASES. Anemias. Acute and chronic leukemias (definition and diagnostic workup). Myelodysplasias and myeloproliferative diseases (main principles). DISEASES OF THE IMMUNE SYSTEM. Multiple myeloma (focus on the diagnostic process). Lymphomas (general principles). BLOOD COAGULATION DISEASES. Thrombotic and hemorrhagic diseases.

Prerequisites
Teaching form
Lessons
Touth only and to only in a management
Textbook and teaching resource
Reviews
Semester
First
Assessment method
"In itinere" written exam with multiple choice test, to evaluate a global knowledge of the program
Final vote is based on the average grade point normalized for credits obtained in each module
Office hours
By appointment
Sustainable Davelenment Coals
Sustainable Development Goals
GOOD HEALTH AND WELL-BEING
